- Summary**
- University of Toronto undergraduate who possesses excellent computer skills as well as having demonstrated leadership, management, and teamwork in past work experiences. My academic awards are further evidence of my ability to contribute and be a valuable part of any team.
 - Familiar with many operating systems (Windows, Linux, and Mac).
 - Able to program well in Java, Python, C, C++, Matlab, Turing.
 - Proficient at diagnosing, and fixing computer problems.

Career History Array Systems Computing Inc., Programmer (Toronto Ontario) 2005 - 2007
I worked on a number of programs for the ADDNS (Advanced deployable day night simulation) project. This involved Windows and Linux development in a variety of languages including C, C++, Matlab.

Achievements included.

- *Resolve – designed and programmed the GUI as well as the handling of experiment data and results.*
- *Aura – For this program I wrote the backend, focusing mainly on the loading and saving of experiments and collected data.*
- *Flight IG – A flight simulation that used multiple computers to render the image. On this project I worked mainly on the Linux backend.*
- *Aura 3 Shotgun – This program was an extension to the Aura program. I was the lead developer for this project planning the development route and writing the Vega Prime code.*

Projects were completed on time and budget with my group contributing significantly to the success of the company.

Airborne Trampoline, Coach 1999 – 2003

Job duties included coaching, supervising, collecting fees, and closing up. I was trusted to manage the club on numerous occasions and deal with all the athletes and families, I also developed a brochure and website for the club.

Education University of Toronto 2004 - current
Currently enrolled in the faculty of Computer Science. Consistently achieving 75%+ in all computer science courses. Completing third year.
